Sheikh Abir Hossan

--Full-Stack Developer | MERN Stack | AI-Assisted Development--
Dhaka, Bangladesh

Summary

Hi, I'm Abir Hossan, a Full-Stack Developer focused on building modern, scalable, and user-centric web applications. I work primarily with JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and modern web technologies.I enjoy turning ideas and real-world problems into practical digital solutions — from responsive frontend experiences to backend services, APIs, databases, and complete web applications.As software development continues to evolve with AI, I believe being a developer today means more than simply writing code. It means understanding problems, making good engineering decisions, learning continuously, and knowing how to use modern tools effectively. Im actively exploring AI-assisted development, AI-powered developer tools, automation, and modern software engineering practices to improve the way I learn, build, debug, and deliver software.With experience in IT operations and web development, combined with my ongoing BBA studies, I bring both technical and business perspectives to the products I build. I enjoy turning ideas into functional applications, solving challenging problems, and learning from every project I work on.Currently, I'm focused on growing as a Full-Stack Developer in an AI-driven software industry, building real-world applications and developing the skills needed to work effectively alongside AI.Exploring: AI-Assisted Development • AI Developer Tools • Automation • TypeScript • Modern Software Architecture.Always learning. Always building. Always adapting.

Experience

Hil Pacific
Web Designer
October 2023 - August 2024 (11 months)
Dhaka, Bangladesh

• Worked with HTML, CSS, JavaScript, Bootstrap, and modern responsive design techniques to build and improve web pages.

• Translated design requirements into clean, responsive, and maintainable frontend implementations.
• Team members to understand requirements and deliver web solutions within project timelines.

Tour Plan Limited
IT Manager
July 2021 - June 2023 (2 years)
Sonargaon Hotel Dhaka

• Worked with different teams to identify technical problems, improve workflows, and maintain operational efficiency.
• Managed day-to-day IT operations and supported the technology infrastructure to maintain reliable business operations.
• Developed strong problem-solving, communication, troubleshooting, and technical support skills through hands-on IT operations.
